Rick,

This will only affect the dissolved gas isotopes.

Please contact me if you have any further questions.

Thank you.

Christy - thanks for letting us know. Can you tell me which analysis is impacted? For these samples, we have dissolved gas isotopes, d13C of DIC, and tritium.

Rick

Hi Rick-

I wanted to let you know that unfortunately a sample from your project was compromised today. I am extremely sorry for this error on our part. We usually take great care while handling samples but today was an exception. Sample EPAMW01d-0412 (Job 18047) fell off the prep bench and the bottle is now cracked. Please let us know if we can do anything to remedy this situation, we know the importance of these samples and this study and do not take a situation like this lightly. Please accept my apologies and know we will make changes to ensure that something like this does not happen in the future. Please feel free to call me if you wish to discuss this further.

Thanks,

Christy Legner
